# Asiamold Select offers mould making and forming solutions for high-quality manufacturing

Well received by the industry for many years, Asiamold acts as a key platform for technologies and solutions in the mould manufacturing and application sector. To better serve the South China market, the show will host an additional event in Shenzhen from 2024 onwards, both under the name of "Asiamold Select". The two events will actively respond to the government's call to protect the environment, by displaying latest moulding and forming solutions that can maximise material efficiency while minimising energy and material consumption.

## Asiamold Select – Guangzhou

4 – 6 March 2024

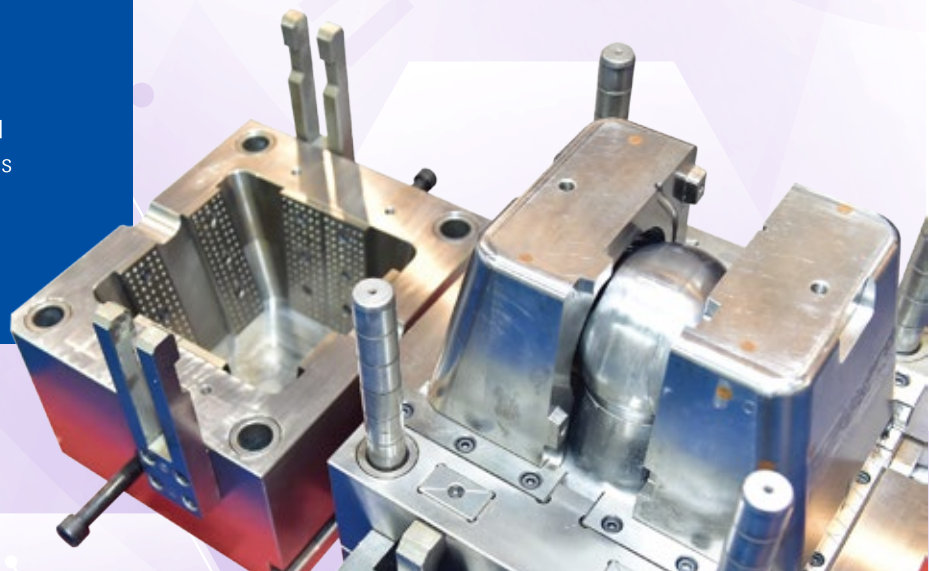

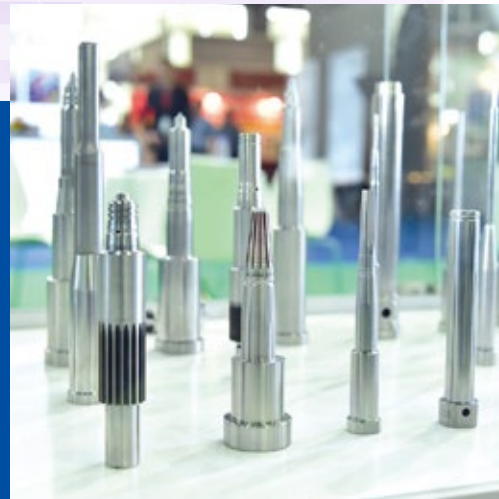

The Guangzhou edition of Asiamold Select will be held in March alongside SPS – Smart Production Solutions Guangzhou (formerly SIAF Guangzhou), focusing on the mould, die and 3D printing sectors in order to take advantage of the synergies for smart manufacturing.

## Asiamold Select – Shenzhen

Autumn 2024

The Shenzhen edition will take place in Autumn concurrently with Formnext + PM South China, where they can explore cooperation between the moulding and additive manufacturing, powder metallurgy and advanced ceramics technologies industries.

Asiamold Select has also established a new partnership with Guangdong Die & Mould Industry Association (GDMA), a leading organisation with 36 years of experience assisting the development of the mould industry in Guangdong. This association has close connections with leading brands, research institutes and community groups in the moulding sector within the region, which will bring valuable industry resources to both editions of Asiamold Select.

## 2023 show figures\*

 450  
exhibitors

 20,000  
sqm of exhibition space

 35,015  
professional visitors (over 55,000 visits)

 153  
buyer delegations

 105  
seminars and summit topics

\* Combined figures with SIAF Guangzhou 2023

## Feedback from exhibitors and buyers

Asiamold attracts professional buyers with sourcing needs in various industries and who are relatively in line with our target clients compared to other fairs. In addition to the high number of visitors, this year there were also many customers from the new energy automotive industry showing interest towards our products. We also met some renowned brands like Xiaopeng Motors, who we plan to follow up with after the show. Overall, we have had great outcomes from participating at the fair.

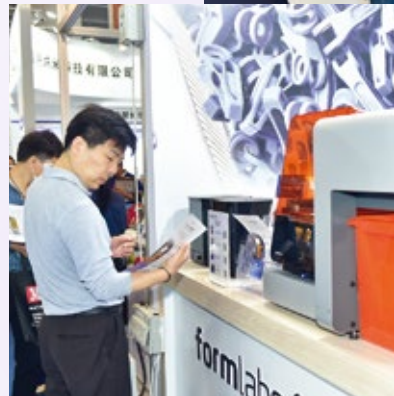

**Exhibitor, Ms Ming Xiaoting, Deputy Sales Director, Zhuhai Gree Daikin Precision Mold Co Ltd**

Asiamold is an excellent opportunity for us to gather first hand our customers' needs, navigate the market, and to find new ways to improve our business. The show is very professionally organised, especially in terms of buyer delegations, which gives us great opportunities to get in touch with new customers.

**Exhibitor, Ms Corin Ke, Senior Marketing Manager of Greater China, Formlabs**

Asiamold is an influential exhibition, and it is also a valuable platform for shoe mold companies to learn about cutting-edge technologies and exchange ideas with other industry players. The show has covered the entire spectrum of the moulding sector, from upstream to downstream.

**Buyer, Mr Roger Huang, Director, Jye Shing Industrial Co Ltd**

## Comprehensive fringe programme enhances industry's interaction and transformation

- ▶ The 5<sup>th</sup> Industrial Moulding Summit
- ▶ Guangzhou International 3D Printing Industry Technology Application Seminar
- ▶ Injection Moulding Advanced Technology Forum

## Premium buyers in 2023

(In no particular order)

# Show details

## Dates and venues

Asiamold Select – Guangzhou

4 – 6 March 2024

China Import and Export Fair Complex

Guangzhou, China

Asiamold Select – Shenzhen

Autumn 2024

Shenzhen World Exhibition and Convention Center

Shenzhen, China

## Organisers

Guangzhou Guangya Messe Frankfurt Co Ltd

Guangdong Die & Mould Industry Association

## Partners

Guangzhou Die & Mould Industry Association

Society of Advanced Moulding Technology

# Exhibition product categories

## Mould making & tooling

- Precision moulds
- Plastics moulds
- Metal moulds
- Die casting moulds
- Stamping moulds
- Metal injection moulds
- Injection moulds
- Mould accessories and spare parts
- Mould materials
- Auxiliary and precision tools
- Rapid prototyping

- Progressive dies
- Hot runner and heat treatment
- Mould surface treatment
- Tool and mould making consultations

## Additive manufacturing and 3D printing

- 3D printers
- 3D scanners
- 3D printing materials
- 3D services
- 3D printer accessories
- Reverse engineering

## Design, engineering & application development

- Design, simulation and visualisation
- Mould development and engineering
- Virtual reality
- Production technologies and inspection
- Measuring machines
- CAD/CAM
- Software
